It may be necessary, however, to continue to apply fertilizer to the pond at short intervals. The collecting of entomostraca from reservoirs and lakes for the newly-hatched fish in the cement ponds is an important part of the work and occupies the time of many people. The peculiar bag-net required for this purpose is 25 to 30 feet long and 2. 5 feet wide throughout its length, the bottom being cut off square and gathered with a string; it is made of fine cotton or calico that has been treated with extract of oak bark or other astringent solution. The bambo pole to which the bag is attached is of about the same length. One man, standing on the bank, operates the net, drawing it slowly through the water and gradually accumulating a mass of water fleas and in addition insects, plants and various other kinds of material which must be separated from the crustaceans. As many species of entomostraca are entirely too large for the mouth and stomach of the goldfish fry, it is necessary to sort them according to size, and this procedure is required during all the stages of the fry period. The separation of the crustaceans into sizes adapted for the different sizes of the fry is accomplished by means of sieves, of which 5 sizes are used, having respectively 130 meshes, 100 meshes, 80 meshes, 60 meshes, and 20 meshes to...
