This publication provides joint doctrine for planning, employing, and assessing air mobility operations across the range of military operations. Air mobility is a network of systems that combines airlift, airdrop, aeromedical evacuation (AE), air refueling (AR), and air mobility support assets, processes, and procedures into an integrated whole to support the transport of personnel and materiel. The Secretary of Defense (SecDef) directs the assignment of air mobility forces to the Commander, United States Transportation Command (CDRUSTRANSCOM) and other combatant commanders (CCDRs). To deter threats against, or to assist in the defense or pursuit of United States (US) national interests, the Department of Defense maintains forces, organizations, and processes necessary to conduct air mobility operations. The National Air Mobility System (NAMS) is a broad and comprehensive system that provides the President, SecDef, and CCDRs with rapid global mobility. The mobility air forces (MAF) are those forces assigned to combatant commands that provide rapid global mobility and conduct air mobility operations. The MAFs four core functions are airlift, AR, air mobility support, and AE. NAMS consists of forces that perform intertheater, intratheater, and organic mobility operations. US Transportation Command (USTRANSCOM) and the geographic combatant commands (GCCs) possess air mobility assets that are capable of performing both intertheater and intratheater operations. A unique aspect of these operations is their reliance on Global Air Mobility Support System (GAMSS) and the worldwide command and control (C2) capabilities of the Air Mobility Command 618th Tanker Airlift Control Center (618th TACC). The GAMSS is comprised of a limited number of permanent en route support locations plus mobile forces that deploy under the global reach laydown strategy. This publication has been prepared under the direction of the Chairman of...
