

Jet-FTIR Spectroscopy of Biomolecular Model Systems

Filesize: 9.45 MB

Reviews

It is simple in study safer to understand. It can be full of knowledge and wisdom Your way of life span is going to be enhance when you full looking at this book.

Cuvillier Verlag Okt 2007, 2007. Taschenbuch. Book Condition: Neu. 210x147x12 mm. Neuware - Bridging the gaps between biology, chemistry and physics, biophysical chemistry studies the microscopic interactions that determine the macroscopic processes in all living organisms. Typical biomolecules such as proteins are complex, flexible macromolecules. They often occur in specific conformations among the vast number of possibilities and conformation has a strong influence on their function. Specific molecular interaction is the key to biomolecular function. Molecular recognition phenomena, therefore, are a basic concept in biochemistry. In order to understand molecular recognition, intermolecular forces have to be characterized in detail. 145 pp. Englisch.
