## Vaccine Safety Research, Data Access, and Public Trust

By Committee on the Review of the National Immunization Program's Research Procedures and Data Sharing Program, National Academy of Sciences

National Academies Press. Paperback. Book Condition: new. BRAND NEW, Vaccine Safety Research, Data Access, and Public Trust, Committee on the Review of the National Immunization Program's Research Procedures and Data Sharing Program, National Academy of Sciences, The Vaccine Safety Datalink (VSD) is a large, linked database of patient information that was developed jointly by CDC and several private managed care organizations in 1991. It includes data on vaccination histories, health outcomes, and characteristics of more than 7 million patients of eight participating health organizations. Researchers from CDC and the managed care groups have used VSD information to study whether health problems are associated with vaccinations. The subsequent VSD data sharing program was launched in 2002 to allow independent, external researchers access to information in the database. In this report, the committee that was asked to review aspects of this program recommends that two new oversight groups are needed to ensure that the policies and procedures of the VSD and its data sharing program are implemented as fairly and openly as possible.

### Reviews

*This composed ebook is wonderful. It really is written in basic words rather than hard to understand. You may like the way the writer composed this pdf.*

-- **Ryder Nolan**

*This book can be well worth a go through, and a lot better than other. It is written in simple words and phrases and not confusing. It's been printed in an exceptionally simple way in fact it is merely right after I finished reading through this pdf by which basically changed me, modify the way I think.*
