Brand New Book ***** Print on Demand *****.Excerpt from Estimating Concrete Buildings The process of building, in the time-honored acceptance of the term, consists of the assembling of units already manufactured, and the fitting of them into their appointed places. Methods of accomplishing these things have been developed through the successive experience of generations of builders until they have crystallized into a traditional practice the cost of which may be prejudged with reasonable accuracy. Concrete construction, on the other hand, is less a process of building than it is of manufacturing. Cement, sand, stone, water and steel are brought together under conditions which produce a chemical action that fuses these elements into a whole quite different from the sum of its constituent parts. The consideration that this occurs on the spot where the unit produced is to remain as part of the finished structure, in no wise alters the essential fact that the process is one of manufacture. The traditional operations of the builder come into play mainly in the placing of subsidiary or subordinate units, and in supplying necessary fittings. The actual procedure...
